

Dashboard 1: Executive Command & Overall Performance

Major Focus: A top-level view of real financial health, blending overall sales metrics with true profitability trends.

- **KPI Cards:** Total Revenue, Total Orders, Total Units Sold, Total Net Profit, Blended Net Margin %, and Total TACoS %.
- **Charts (Max 6):**
 1. **True Profitability Trend (Combo Chart):** X-axis: Month | Y-axis (Bar): Total Revenue | Y-axis (Line): Net Profit. Ensures revenue growth isn't sacrificing profit.
 2. **Order & Unit Trajectory (Dual Line Chart):** X-axis: Date | Line 1: Orders | Line 2: Units Sold.
 3. **Cost Structure Waterfall (Waterfall Chart):** Categories: Total Revenue -> (-) COGS -> (-) FBA Fees -> (-) Taxes -> (-) PPC Cost -> (-) Refunds -> (=) Net Profit.
 4. **TACoS vs. Net Margin (Dual Axis Line Chart):** X-axis: Date | Line 1: TACoS % | Line 2: Net Margin %.
 5. **YoY / MoM Growth Velocity (Bar/Line Chart):** Compares current year/month revenue versus the previous year/month.

Dashboard 2: Product Portfolio & "Bleeding SKUs"

Major Focus: Granular SKU-level analysis to highlight top-performing products, identify "false positives," and trim unprofitable items.

- **KPI Cards:** Total Distinct Products, Top Product Revenue, Average Revenue per Product, Total COGS.
- **Charts (Max 6):**
 1. **Top 10 Products by Revenue (Horizontal Bar Chart):** Y-axis: Product | X-axis: Total Revenue.
 2. **Profit Pareto 80/20 Rule (Pareto Chart):** X-axis: SKUs | Y-axis (Bar): Net Profit | Y-axis (Line): Cumulative Profit %.
 3. **The "Vanity vs. Sanity" Matrix (Scatter Plot):** X-axis: Total Revenue | Y-axis: Net Margin % | Bubble Size: Total Units.
 4. **Margin Erosion by SKU (100% Stacked Bar):** X-axis: Top 10 SKUs | Segments: COGS %, FBA %, PPC %, Net Margin %.
 5. **Bleeding SKUs Alert (Data Table):** Columns: SKU, Net Margin %, TACoS, Refund %, FBA Fees, with conditional red formatting for negative ROI.

Dashboard 3: Marketplace & Geographic Performance

Major Focus: Country-level comparison to direct geographic expansion, budget allocation, and localize health tracking.

- **KPI Cards:** Total Revenue by Marketplace, Best Performing Marketplace, Total Orders by Marketplace, Average Net Margin by Marketplace.
- **Charts (Max 6):**
 1. **Revenue vs. Net ROI by Marketplace (Clustered Bar Chart):** X-axis: Marketplace | Bar 1: Revenue | Bar 2: Net ROI %.
 2. **Marketplace Revenue Contribution (Donut Chart):** Shows the % split of revenue between UK, FR, DE, IT, and ES.
 3. **Multi-Marketplace Performance Trend (Line Chart):** X-axis: Month | Lines: Revenue for UK, FR, DE, IT, ES.
 4. **Profitability by Day of the Week per Region (Heatmap):** Rows: Marketplaces | Columns: Mon-Sun | Values: Net Profit.
 5. **Cost Breakdown by Marketplace (Stacked Bar):** X-axis: Marketplace | Segments: COGS, FBA Fees, PPC Cost, Net Profit.

Dashboard 4: Marketing, Traffic & "The Halo Effect"

Major Focus: Optimizing PPC budgets, analyzing funnel health, and proving the organic ranking impact of paid ads.

- **KPI Cards:** Total Sessions, Average CTR (Clicks/Impressions), Average Conversion Rate (Unit Session %), Total PPC Spend, Total PPC Sales.
- **Charts (Max 6):**
 1. **Traffic vs. Conversion Quadrants (Scatter Plot):** X-axis: Sessions | Y-axis: Unit Session % | Dots: SKUs. Identifies "Hidden Gems" and "Money Leakers".
 2. **The Halo Effect Tracker (Dual Axis Line Chart):** X-axis: Date | Line 1: PPC Spend (\$) | Line 2: Organic Units Sold.
 3. **PPC Funnel Health (Funnel Chart):** Stages: Impressions -> Clicks -> Sessions -> PPC Orders.
 4. **CPC vs. PPC Conversion Rate Trend (Combo Chart):** X-axis: Month | Area: CPC | Line: PPC Conv %.
 5. **PPC Efficiency by Marketplace (Grouped Bar Chart):** X-axis: Marketplace | Bar 1: PPC Cost | Bar 2: PPC Sales.

Dashboard 5: Refund Leakage & Quality Control

Major Focus: Stopping systemic cash bleed caused by returns, defects, or poor listing representation.

- **KPI Cards:** Total Refunded Units, Total Refund Cost Impact (\$), Average Refund %.
- **Charts (Max 6):**
 1. **Financial Impact of Refunds Over Time (Area Chart):** X-axis: Month | Y-axis: Refund Cost Impact.
 2. **Worst Offenders: Refund % by SKU (Horizontal Bar Chart):** Y-axis: SKU | X-axis: Refund %, with an average benchmark line.
 3. **Refunds vs. Net Margin Correlation (Scatter Plot):** X-axis: Refund % | Y-axis: Net Margin % | Dots: Product Groups.
 4. **Promo Induced Returns (Grouped Bar Chart):** X-axis: Top SKUs | Bar 1: Organic Refund % | Bar 2: Promo Refund %.
 5. **Refund Trend by Marketplace (Line Chart):** X-axis: Month | Lines: UK, FR, DE, IT, ES.

Dashboard 6: Promotion Cannibalization & Inventory Velocity

Major Focus: Analyzing discount effectiveness, ensuring promotions acquire new customers rather than cannibalizing organic sales, and historical velocity tracking. *(Note: All predictive/AI elements have been removed.)*

- **KPI Cards:** Total Promo Units, Total Promo Amount (\$), Average Daily Units (Velocity), Promo ROI.
- **Charts (Max 6):**
 1. **Revenue Composition (100% Stacked Bar Chart):** X-axis: Month | Segments: Organic Sales vs. PPC Sales vs. Promo Sales.
 2. **The Cannibalization Tracker (Dual Axis Line Chart):** X-axis: Date | Line 1: Promo Dependency % | Line 2: Organic Units.
 3. **Promo Spend vs. Incremental Profit (Bar/Line Combo):** X-axis: Month | Bar: Promo Amount (\$) | [cite_start]Line: Net Profit (\$).
 4. **Seasonality Heatmap (Historical Matrix):** Rows: Product Groups | Columns: Months (Jan-Dec) | Values: Average Daily Sales.
 5. **Price Elasticity Matrix (Scatter Plot):** X-axis: Per Unit Revenue (Price) | Y-axis: Total Units Sold | Filter: Single SKU.
 6. **Velocity vs. FBA Fee Burden (Scatter Plot):** X-axis: Average Daily Units | Y-axis: FBA Fees %. Flags bulky/slow items eating up storage fees.
